COURSE OVERVIEW

Regulatory compliance involves the act and process of ensuring adherence to regulations. Every government enacts laws, legislation, policies, regulations and rules in order to govern societal interactions. These regulations are administered by bodies established to enforce compliance independently or with oversight by a government organization. Regulators and oversight agencies carry out regulatory compliance by interpreting regulations to enable the understanding, compliance and conformance by the regulated entities. They also carry out inspections to monitor compliance, enforce penalties to punish defaulters, and engage in consultations with regulated parties to address issues arising out of the process. Enforcing regulatory compliance does not come without challenges. It requires the establishment of strategies and systems to monitor and enforce compliance. *Monitoring and Management of Regulatory Compliance* is a 5-day course that is intended to determine the best and the most effective ways of regulating and overseeing compliance with regulatory requirements by establishing effective strategies and systems to monitor and manage compliance.
